The George Washington University
Department of Statistics
STAT 1053-Section 14: Introduction to Statistics in Social Science
Tentative Syllabus (Updated on Jan 8, 2022)

Course information
Semester: Spring 2022
Class: TR 6:10pm-7:25pm (DC Time, i.e., Eastern Time)
Location: PHIL B152
No Class/Recitation:
   Feb 1 (T, Instructor’s observation of Chinese New Year)
   Mar 15-17 (TWR, Spring Break)
Make-Up Class: Apr 26 (T, Make-Up Day)

Instructor
Name: Dr. Xiaoke Zhang
Campus Address: 765 Rome Hall
Work Phone: (202) 994-8294
Email: xkzhang@gwu.edu
Tentative Office hours:
   • Virtual: TR 11am-noon (https://gwu-edu.zoom.us/my/xkzhang)
   • By appointment

Teaching assistant (TA)
Name: TBA
Campus Address: TBA
Email: TBA
Recitations: ROME 351:
   F 12:45pm-1:35pm (Section 30)
   F 2:20pm-3:10pm (Section 31)
Office hours: TBA

Course description
This is an introductory course on statistics, which covers the following fundamental elements of statistics: frequency distributions, descriptive measures, probability, probability distributions, sampling, estimation, tests of hypotheses, regression and correlation, and applications to social sciences.
Note: STAT1051, 1053, 1111 and 1127 are related in their subject matter, and credit for only one of them may be applied toward a degree.

Course prerequisites
Arithmetic and algebra at the high school level may be needed.

Learning outcomes
Students will learn analyze “small data” (of small size, low dimension, and simple structure) and interpret classical statistical results. As a result of completing this course, students will be able to
1. Distinguish different data types;
2. Perform exploratory analysis in terms of various summary statistics and visualization tools;
3. Calculate probabilities for important distributions;
4. Conduct univariate statistical analysis using confidence intervals and hypothesis testing procedures;
5. Describe and interpret bivariate relationship in terms of simple linear regression and correlation (if time permits);
6. Utilize software, i.e., R, to analyze real datasets.

Required textbooks and recommended reference
1. **REQUIRED textbooks (either hard or electronic copy):**
2. Recommended reference: Student solution manual for MS.

Blackboard.
Blackboard is the only online management system for this course and please get familiar with Blackboard and check it frequently. It will be used by the instructor and/or TA for posting announcements (*Announcements*), course materials (*Electronic Reserves*), assignments (*Assignments*), tests (*Tests*), Zoom lectures, grades, etc.

Average amount of direct instruction or guided interaction with the instructor
2.5 hours per week.

Average minimum amount of independent (out-of-class) learning
5 hours per week.

Week-by-week schedule of topics to be presented and scheduling of final examinations
This is a tentative plan. The actual schedule may be slightly different.

### Grading

1. **Composition:** Total=100%
   a. **Homework (24%):** 5 or 6 homework will be assigned. The **lowest two homework grades will be dropped** before calculating the overall grade. Detailed information will be given before the first homework assignment.
   b. **Quizzes (16% = 4% × 4):** Six quizzes will be given on the following dates: **Jan 27 (R), Feb 10 (R), Feb 24 (R), Mar 10 (R), Mar 31 (R), and Apr 14 (R).** The lowest two quiz grades will be dropped before calculating the overall grade. Detailed information will be given before the first quiz.
   c. **Midterms (30% = 15% + 15%):** Two midterms will be given. The dates are **Mar 3 (R) and Apr 7 (R).** Detailed information will be given about one week before each midterm.
   d. **Final exam (30%):** As scheduled by the Office of the Registrar, the final exam will be given on **TBA.** Detailed information will be given by the last week of the semester.

2. **Final Grade Curve:** Below is a minimum guarantee:
   - 90.00 or above=A, 89.99-87.00=A-, 86.99-84.00=B+, 83.99-81.00=B, 80.99-78.00=B-, 77.99-75.00=C+, 74.99-72.00=C, 71.99-69.00=C-, 68.99-66.00=D+, 65.99-63.00=D, 62.99-60.00=D-, < 60.00=F.

### Course policies

1. **Attendance:** Attendance is required for all students. If you miss a class or recitation, the instructor or TA will NOT provide a makeup class or recitation; please go to Blackboard to find relevant course materials and announcements. **Those who are not enrolled in this course are NOT allowed to attend any class or recitation.**

2. **Makeup quizzes/exams:** **No makeup quizzes or exams will be given except for emergencies with proper documentation.** Requests for makeup quizzes or exams must be made to the instructor by email for approval BEFORE the original
quiz/exam time. If approved, students are responsible for both reminding the
instructor of giving makeup quizzes/exams and taking them within one week of
the original quiz/exam dates. Any missed quiz or exam will be counted as zero
point.

3. Disputes on grades: Contact the instructor and TA within one week after the
grades are posted on Blackboard.

4. Asking questions: Office hours are absolutely the best time to ask questions and
receive prompt answers. It is not recommended to ask questions by email since it
is very inefficient, and it is often unrealistic to receive immediate responses. If
you have to ask questions by email, **itemize all your questions in one email for
clarity and convenience to reply** (writing emails is NOT texting). The instructor
typically checks emails ONLY on workdays.

**Advice**

1. Syllabus: **The syllabus serves as a reliable guideline for the course. Please keep the latest version of the syllabus and get familiar.** You can find the
answers to a lot of your questions regarding this course from the syllabus.

2. Attitude: Sufficient in-class and out-of-class efforts are needed to receive a
satisfactory grade (no pain no gain).

3. In-class learning:
   a. **Due to time limit, lectures by the instructor focus on motivations,
concepts, important formulas and skills, and representative examples (not many).**
   b. Recitations primarily focus on exercises and software use.

4. Recommended learning strategy:
   a. Attend lectures and recitations.
   b. After each lecture or recitation:
      i. Review lecture/recitation slides, recordings (if available), your
         own notes and corresponding chapters of the textbooks,
         independently or in groups, **preferably within one day after each
class** (suggested by the Ebbinghaus “forgetting curve”).
      ii. Redo lecture/recitation examples independently or in groups.
      iii. Attend office hours with your remaining questions.
   c. After each homework is assigned:
      i. Start working on each homework as soon as it is assigned.
      ii. Scan through homework problems. If you feel difficult in working
on a majority of them, review the notes and textbooks again,
and/or discuss with classmates; otherwise do homework
independently with minimum reference to the notes or textbooks.
      iii. After each homework is returned, compare your answers with
solutions and/or discuss with other classmates. If there are many
errors, review the notes and textbooks again, and/or discuss with
other classmates.
      iv. Attend office hours with your remaining questions; do more
textbook exercises if necessary.
5. Calculators: **Get familiar with your calculator** (and your backup calculator). Use it when doing homework (for this course and others).
6. Internet: Search engines are our friends!

**University policies**

**Academic Integrity Code**
Academic integrity is an essential part of the educational process, and all members of the GW community take these matters very seriously. As the instructor of record for this course, my role is to provide clear expectations and uphold them in all assessments. Violations of academic integrity occur when students fail to cite research sources properly, engage in unauthorized collaboration, falsify data, and otherwise violate the [Code of Academic Integrity](https://studentconduct.gwu.eduacademic-integrity). If you have any questions about whether or not particular academic practices or resources are permitted, you should ask me for clarification. If you are reported for an academic integrity violation, you should contact the Office of Student Rights and Responsibilities (SRR) to learn more about your rights and options in the process. Consequences can range from failure of assignment to expulsion from the university and may include a transcript notation. For more information, please refer to the SRR website ([https://studentconduct.gwu.eduacademic-integrity](https://studentconduct.gwu.eduacademic-integrity)), email [rights@gwu.edu](mailto:rights@gwu.edu), or call 202-994-6757.

**University policy on observance of religious holidays**
Students must notify faculty during the first week of the semester in which they are enrolled in the course, or as early as possible, but no later than three weeks prior to the absence, of their intention to be absent from class on their day(s) of religious observance. If the holiday falls within the first three weeks of class, the student must inform faculty in the first week of the semester. For details and policy, see “Religious Holidays” at [provost.gwu.edu/policies-procedures-and-guidelines](https://provost.gwu.edu/policies-procedures-and-guidelines).
Use of Electronic Course Materials and Class Recordings

Students are encouraged to use electronic course materials, including recorded class sessions, for private personal use in connection with their academic program of study. Electronic course materials and recorded class sessions should not be shared or used for non-course related purposes unless express permission has been granted by the instructor. Students who impermissibly share any electronic course materials are subject to discipline under the Student Code of Conduct. Please contact the instructor if you have questions regarding what constitutes permissible or impermissible use of electronic course materials and/or recorded class sessions. Please contact Disability Support Services at disabilitysupport.gwu.edu if you have questions or need assistance in accessing electronic course materials.

Academic support

Writing Center

GW's Writing Center cultivates confident writers in the University community by facilitating collaborative, critical, and inclusive conversations at all stages of the writing process. Working alongside peer mentors, writers develop strategies to write independently in academic and public settings. Appointments can be booked online at gwu.mywconline.

Academic Commons

Academic Commons provides tutoring and other academic support resources to students in many courses. Students can schedule virtual one-on-one appointments or attend virtual drop-in sessions. Students may schedule an appointment, review the tutoring schedule, access other academic support resources, or obtain assistance at academiccommons.gwu.edu.

Support for students outside the classroom

Disability Support Services (DSS) 202-994-8250

Any student who may need an accommodation based on the potential impact of a disability should contact Disability Support Services at disabilitysupport.gwu.edu to establish eligibility and to coordinate reasonable accommodations.
Counseling and Psychological Services 202-994-5300
GW's Colonial Health Center offers counseling and psychological services, supporting mental health and personal development by collaborating directly with students to overcome challenges and difficulties that may interfere with academic, emotional, and personal success. healthcenter.gwu.edu/counseling-and-psychological-services.

Safety and Security
- In an emergency: call GWPD 202-994-6111 or 911
- For situation-specific actions: review the Emergency Response Handbook at: safety.gwu.edu/emergency-response-handbook
- In an active violence situation: Get Out, Hide Out, or Take Out. See go.gwu.edu/shooterpret
- Stay informed: safety.gwu.edu/stay-informed

Statistical Software
Copy and paste each link in a web browser to find each webpage.
Step 1: Download and install R.
(1) Go to https://www.r-project.org.
(2) Click download R.
(3) Among the list of CRAN mirrors, click any link in the USA.
(4) Download R for Linux, Mac OS X or Windows (depending on your computer).
   (5a) For Windows, download base.
   (5b) For Mac OS X, download the latest version (a .pkg file) that is compatible with your laptop’s OS version. To check the OS version of your laptop, you can click the small apple icon  on the top-left corner of your laptop screen and choose “About This Mac”. Then you can find the version number under “macOS”.
   (6) Install R after the download is complete.

Step 2: AFTER R is installed, download and install RStudio.
(1) Go to https://www.rstudio.com/products/rstudio/download/
(2) Click DOWNLOAD under RStudio Desktop (Open Source License, FREE).
(3) Download the installer that is compatible with your laptop and install RStudio.

Step 3: Install the R package R Commander (Rcmdr) in RStudio.
(1) Open RStudio.
(2) Click “Packages” in the bottom-right window; click “Install”; type and select Rcmdr under “Packages”; click “Install”. You may see a lot of code running in the Console, which is normal, so don’t worry.
(3) For Mac OS X users, download and install XQuartz (https://www.xquartz.org), and restart your laptop. For Windows users, skip this step.

(4) Type the command `library(Rcmdr)` in the RStudio Console, and install all missing packages if any.

(5) To use R Commander in the future, open RStudio, and type the command `library(Rcmdr)` in the Console.

(6) When a window like below pops up, congratulations—the installation is complete and successful!

![R Commander window](image)

**Example:** Import data to R Commander in RStudio.

(1) Download the MS data zip folder from Blackboard -> Electronic Reserves and unzip it in your local computer.

(2) Open RStudio.

(3) Type the command `library(Rcmdr)` in the RStudio Console.

(4) In the window below, click “Data” -> “Import Data” -> “From text file, clipboard, or URL” -> “OK” -> Select a text data file within a specific chapter subfolder of the MS data folder and click “Open”.

**More installation notes for trouble shooting can be found here:**
https://socialsciences.mcmaster.ca/jfox/Misc/Rcmdr/installation-notes.html

**Disclaimer**

The instructor retains the right to revise the syllabus. Whenever the syllabus is changed, announcements will be made in class and/or on Blackboard.
