## **COURSE DESCRIPTION**

This is a general survey course in elementary statistics that will broadly cover descriptive statistics, probability, sampling, and inference, hypothesis testing and simple linear regression.

The goal of the course is for students to obtain a good basic understanding of statistics. The course covers Chapters 1 through 8 and 10 excluding “Optional” sections, in the textbook. STAT 1051, 1053, 1111, and 1127 are related in their subject matter, and credit for only one of the six may be applied toward a degree.

## **COURSE PREREQUISITE**

High school algebra is essential.

## **LEARNING OUTCOMES**

Students will learn to use a variety of fundamental statistical principles integrated with business, economic and social science applications. They will learn to analyze data using appropriate statistical techniques and to interpret the findings. Students will also learn the statistical/quantitative techniques necessary for further study in business, economics, and social sciences. More specifically, upon successful completion of this course, the student, among other skills, will be able to:

1. Describe the differences between the various types of data.
2. Apply various descriptive graphical techniques.
3. Calculate and interpret measurements of central tendency.
4. Describe the characteristics of discrete and continuous probability distributions.
5. Calculate the standardized values of a normal distribution.
6. Calculate estimates of population parameters using sample data.
7. Develop confidence interval
8. Determine sample size
9. Conduct hypothesis testing
10. Perform simple linear regression analysis and compute correlations using paired data.
11. Use software for statistical analysis
12. Use software for generating statistical graphs

## **AVERAGE MINIMUM AMOUNT OF LEARNING TIME EXPECTED PER WEEK**

The University policy states:

*In a 15-week semester, including exam week, students are expected to spend a minimum of 100 minutes of out-of-class work for every 50 minutes of direct instruction, for a minimum total of 2.5 hours a week. A 3-credit course should include 2.5 hours of direct instruction and a minimum of 5 hours of independent learning, totaling a minimum of 7.5 hours per week.* More information about GW’s credit hour policy can be found at:
